

Ahmed Hagar

Front End Developer & Designer | ahmedhagar.com

Junior front end developer and designer creating modern, responsive and accessible websites. Coming from a journalism background with 5 years of published writing experience.

Project Experience (find more on [Github](#))

SafeDine

Developer | July 2021 - Oct 2021

- Built a React/Next.js SPA that allows users to find restaurants in their area
- Utilized the Yelp and Google Maps APIs to find restaurant data and display user and restaurant locations on a map
- Designed the website with Tailwind CSS
- Managed API calls from user input and passed data between components through state management

Knights Club

Developer | May 2021 - Aug 2021

- Built a social media app with 6 other developers in PHP
- Created the wireframes and general website design
- Assisted in the ERD database design in MySQL
- Other features I worked on include, user registration & login, server-side authentication and user search

Humber College

Web Development Student | January 2021 - Present

- Worked on project management and user design/research courses and activities
- Practiced UX research methods, such usability tests, crafting user personas, card-sorting, etc.
- Planning website designs with wireframes and mockups
- Collaborated with team members to create presentations and reports showcasing research results and website plans

Other Work Experience (find more on [LinkedIn](#))

Annex Gleaner

Intern/Freelance Contributor | Feb 2018 - Oct 2019

- Contributed stories, photos, and for a community paper that serves Toronto's Annex neighbourhood.
- Contacted and interviewed residents, councillors, and community leaders
- Researched and prepared questions for interviews pertaining relevant issues impacting the community
- Consistently met strict deadlines before publication
- Hired as a freelance contributor after a successful internship
