Project Experience (find more on Github)

Humber College
Web Development Student | January 2021 - Present
- Worked on project management and user design/research courses and activities
- Practiced UX research methods, such usability tests, crafting user personas, card-sorting, etc.
- Planning website designs with wireframes and mockups
- Collaborated with team members to create presentations and reports showcasing research results and website plans

SafeDine
Developer | July 2021 - Oct 2021
- Built a React/Next.js SPA that allows users to find restaurants in their area
- Utilized the Yelp and Google Maps APIs to find restaurant data and display user and restaurant locations on a map
- Designed the website with Tailwind CSS

Knights Club
Co-Developer | May 2021 - Aug 2021
- Built a social media app with 6 other developers in PHP
- Created the wireframes and general website design
- Assisted in the ERD database design in MySQL
- Other features I worked on include user registration & login, server-side authentication and user search

Other Experience

Annex Gleaner
Freelance Contributor | Feb 2018 - Oct 2019
- Published stories and contributed photos for paper serving prominent Toronto neighbourhood
- Routinely arranged and conducted interviews with residents, councillors, and community leaders
- Researched and prepared interviews pertaining relevant issues impacting the community
- Consistently met strict deadlines before publication
